

# CRAFTER'S WILD FOREST GIN

## NORDIC BY NATURE

Crafter's Wild Forest Gin is inspired by the evergreen untouched forests of Estonia. Forests near the shoreline shaken by autumnal winds, rocks gathering moss, tall ancient trees touching the sky and adventurous fishermen tarring their boats. In short this is where our gin is coming from. Bold, earthy flavours of the forest. Let's just say - wild. Adventure starts here.

## THE TASTE OF GREEN – EVERGREEN RECIPE NO. 27

At the heart of our crisp botanical mix is a coniferous trio of juniper berries, spruce thorns and pine shoots. Late summer heather flowers and blueberry shoots gently blend in, adding a fruity floral character. On top of that a distinctive touch of smokiness and mineral hue. Nordic at its best, it actually tastes and smells like a fresh wild forest. Saving the greenest fact to the last - Crafter's sustainably distilled juniper is at the core of our craftsmanship. Crafter's Wild Forest Gin is the most beautiful shade of green.

## FROM CLASSICS TO SIGNATURE

Crafter's Wild Forest Gin is a social gin honouring the cocktail hour. In addition to the fact that our distilled botanicals inside the bottle are besties having a merry good time, they also marry really well with other ingredients. A dream for professional bartenders and cocktail enthusiasts all over the world. Whether it's a simple and freshtastic gin & tonic served with plenty of ice and a lemon peel or a "forested" Negroni or a frothy herbal gin sour. Not to mention a greenish Dry Martini, stirred with two olives.

Crafter's Wild Forest Gin is crafted for making classics as well as unexpected creative cocktails.
