

KINGSMILL

DISTILLED GIN

SPECIAL QUALITY RECIPE

The masters of Liviko have 80 long years of experience distilling from herbs. Carefully selected spices and flavorings are used to make a gin distillate with the pot still method, forming the basis for Kingsmill Distilled Gin.

KINGSMILL DISTILLED GIN

Product is made with high-quality grain spirit, specially treated water, high-quality juniper berries, ginger, as well as various spices and natural flavourings. The product is made solely of natural ingredients.

It's the combination of active agents in carefully selected flavourings which produce an aromatic, pleasantly fresh and at the same time spicy drink.

The combination of flavourings and spices creates a perfect bouquet: juniper berry, ginger and other components added in small amounts and known only to the masters give Kingsmill Distilled Gin an absolutely unique flavour.

Alc. 38% vol
